

# **ANNUAL PROGRESS REPORT ON THE GOALS AND TARGETS WE COMMITTED 2024-2025**

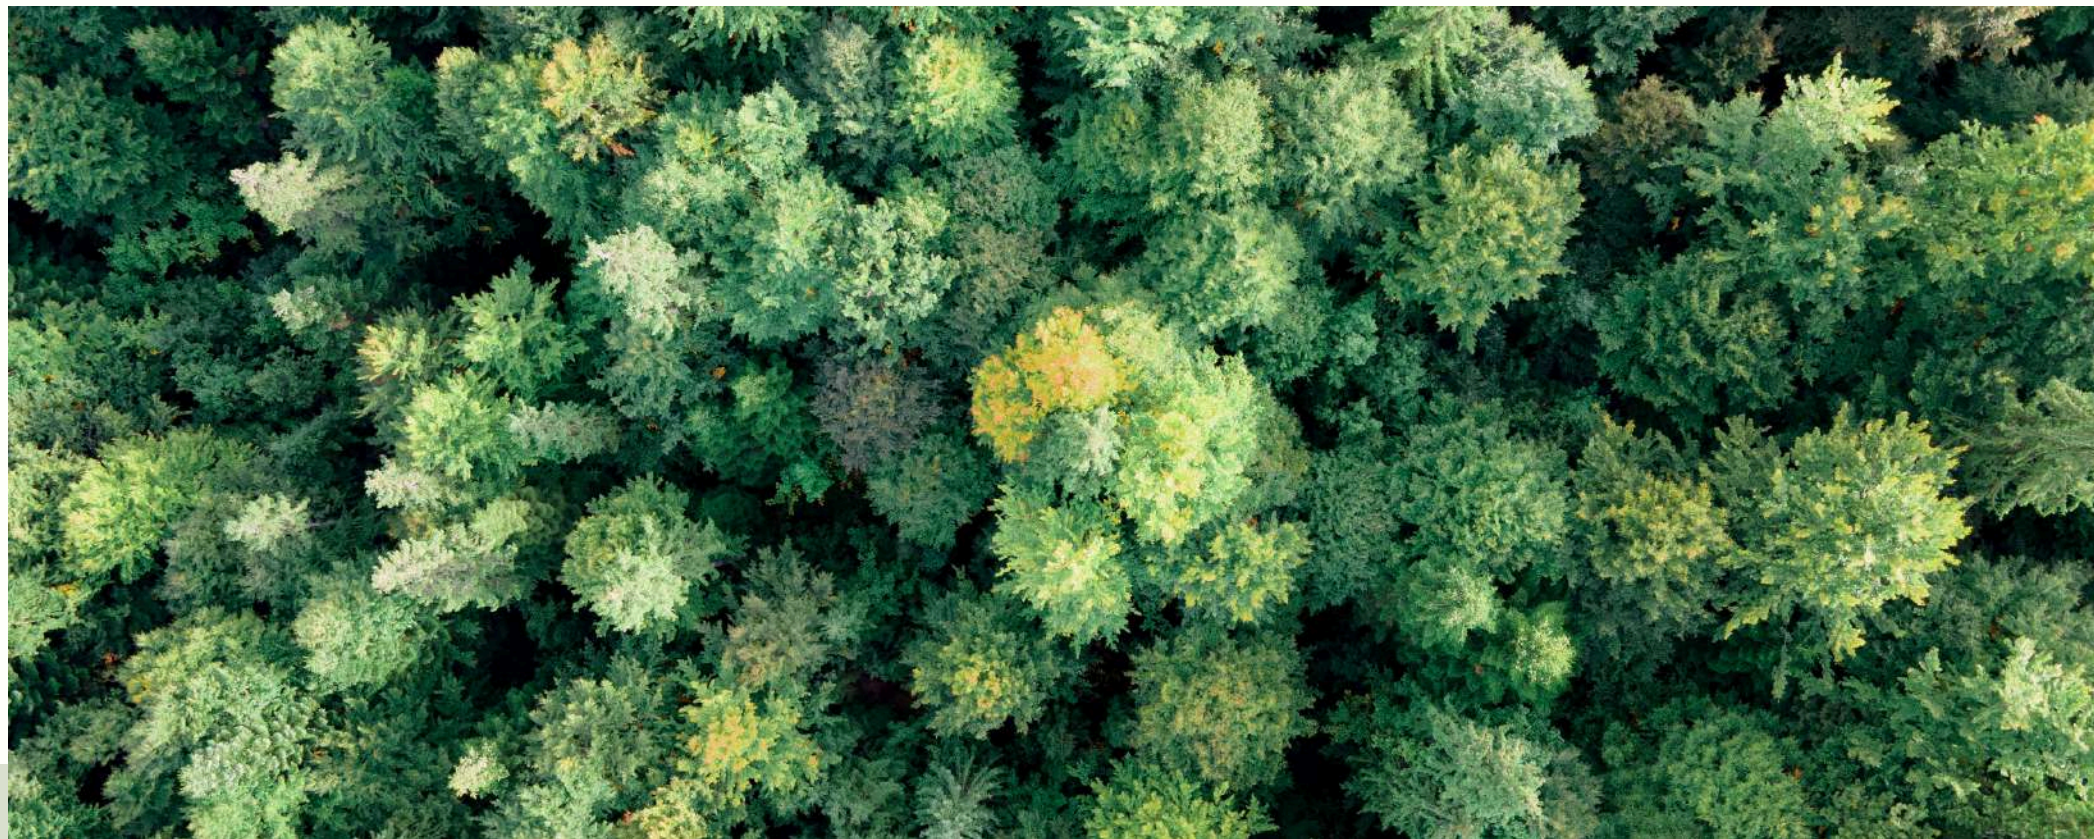

**Sustainable development  
goals**

# Introduction

**Take urgent action to combat climate change and its impacts. Every person, in every country in every continent is impacted in some shape or form by climate change.**

**Navoi State University (NSU) is committed to contributing to the achievement of SDGs through various research, educational, and community based initiatives. The university actively publishes its progress on this goal through annual reports, research publications, and specific projects aimed at poverty reduction**

**A Scientific-Practical Conference on Climate Change Has Begun at Navoi State University**  
**On October 3–4, Navoi State University is hosting a national scientific-practical conference on the topic “Problems and Solutions of Ecology, Economy, and Sustainable Development in the Context of Climate Change.”**

**Scholars, specialists, and representatives from various institutions and organizations are participating in the event, sharing their scientific insights and opinions within the framework of the topic.**

**The official opening ceremony of the conference took place today. The Rector of Navoi State University, Professor M. Kalonov, delivered the opening speech, emphasizing the importance of addressing issues related to climate change, ecology, and sustainable economy in Uzbekistan.**

## “ECO-INNOVATION–2025” – A Step Toward a Green Future! 🌱

The “Eko-Innovation – 2025” exhibition held at Navoi State University became a true celebration of young inventors, innovative ideas, and environmental responsibility! 🌍✨

The event not only showcased the creative potential of young students but also served as an inspiration for important steps toward environmental protection and sustainable development.

### About the Exhibition:

The event was opened by the Vice-Rector for Research and Innovation, S. Khujjiyev. 30 participants, both individual and team-based, presented their unique ideas to the public.

27 innovative projects were showcased in key areas:

**Environmental protection:** Modern solutions for combating climate change and recycling waste.

**Renewable energy sources:** Efficient use of solar, wind, and other natural resources.

**Innovative eco-technologies:** New approaches to environmental challenges through robotics, sensors, and mobile applications.

## Roundtable Discussion Held on the Occasion of International Climate Day

On May 15 — International Climate Day, a roundtable discussion was held at the Faculty of Exact Sciences of Navoi State University with the participation of students. The event was organized by the Chairperson of the Navoi City Council of the Ecological Party of Uzbekistan.

During the discussion, the party representative emphasized the current relevance of climate issues, the ongoing ecological reforms in Uzbekistan, the negative effects of climate change, and the crucial role of civil society — especially youth — in addressing these challenges and promoting environmental sustainability.

13 CLIMATE ACTION

## "Intellectuals' Park" Established within the Nationwide "Green Future" Marathon

The large-scale environmental event brought together representatives from more than 100 higher education institutions across Uzbekistan — including rectors, professors, scientists, and active students.

Rector of Navoi State University, Professor Mukhiddin Kalonov, together with the university press secretary and a group of student volunteers, actively participated in the marathon.

Following the speeches of the Chairman of the Jokargy Kenes of Karakalpakstan and the Minister of Higher Education, Science and Innovation, participants planted trees across an 8-hectare area to create the “Intellectuals’ Park.”

This initiative plays a significant role in ensuring ecological sustainability, improving the environmental condition of the Aral Sea region, and strengthening climate resilience across Uzbekistan.

## Uzbekistan Presented Its Main Climate Goals at the UN Climate Summit in New York

🌐 On September 24, the UN Climate Summit was held in New York at the initiative of UN Secretary-General António Guterres and Brazilian President Luiz Inácio Lula da Silva.

👥 The event gathered representatives from nearly 100 countries, including leaders from more than 40 nations.

📍 The main focus of the meeting was preparation for the upcoming COP30 Conference, which will take place in Belém, Brazil, in November under the framework of the UN Framework Convention on Climate Change (UNFCCC).

During the summit, Uzbekistan presented its key climate action goals, emphasizing the country's commitment to reducing greenhouse gas emissions, enhancing climate resilience, and promoting sustainable, green development.

# “We Are the Protectors of Nature” Eco-Intellectual Quiz Held Among Students

At the Faculty of Preschool and Primary Education of Navoi State University, an intellectual competition titled “**We Are the Protectors of Nature**” was held in cooperation with the **Navoi Regional Council of the Ecological Party of Uzbekistan.**

Ten active and inquisitive student teams participated in the eco-intellectual quiz to test their knowledge and awareness.

During the competition, participants were presented with questions related to ecology, waste recycling, rational use of natural resources, green lifestyles, and global environmental issues. 🌍💡

## “Green Nation” – A Bold Step Toward a Green Future! 🌱

Today, within the framework of the nationwide project “Green Nation” (“Yashil makon”), 3,000 elm trees were planted on the land area of Navoiy State University located in the Malik neighborhood of Karmana district.

The event saw active participation from the university’s academic and administrative staff. Teachers, volunteer students, the “Qalqon” team, and service employees all joined hands in the tree-planting initiative.

This activity reflects the growing environmental awareness and ecological culture among the youth and intellectual community of our country.

## 3,000 Trees Planted in Karmana District as Part of the “Green Nation” Project

Today, Navoiy State University organized a large-scale tree-planting campaign in the Karmana district within the framework of the “Green Nation” (“Yashil makon”) national project.

This initiative is aimed at improving the ecological environment, expanding green areas, and enhancing environmental awareness among the population.

The event was attended by Professor Mukhiddin Kalonov, Rector of Navoiy State University, along with many professors, teachers, volunteers, and environmental activists. Together, they planted thousands of saplings, contributing to the expansion of green spaces and a cleaner, healthier environment. 🌱

The effective implementation of ***Climate Action*** in Uzbekistan reflects a growing national awareness of the urgent need to combat climate change. Through integrated policies on renewable energy, sustainable land use, and ecological education, Uzbekistan demonstrates its commitment to global climate goals.

Overall, these efforts not only contribute to environmental stability but also ensure sustainable economic growth, public health, and the well-being of future generations — reinforcing the nation’s vision of a cleaner, greener, and more resilient future.

The country has adopted the “**Strategy for Transition to a Green Economy (2019–2030)**”, aiming to increase energy efficiency and the share of renewables in total energy production.

Projects like the “**Yashil Makon**” (**Green Space**) initiative contribute to carbon reduction by planting millions of trees across the nation.

Climate risk assessment and disaster management systems are being strengthened, especially in rural areas vulnerable to drought and land degradation.
